AGILE DEVELOPMENT AND DEVOPS

Lab Fat exam

NAME : Alijingi charan

RegNo: 23MIS0187

COURSENAME: Agile development and devops

Faculty: Dr Balaganesh

Library Book Mnagement System

Tasks:

1) Develop book listing and lending logic

1A)

Code:

```
import java.util.*;

class Book {
    int id;
    String title;
    boolean isAvailable;

    Book(int id, String title) {
        this.id = id;
        this.title = title;
        this.isAvailable = true;
    }
}

class Library {
    List<Book> books = new ArrayList<>();

    void addBook(int id, String title) {
        books.add(new Book(id, title));
    }

    void listBooks() {
```

```
        for (Book b : books) {
            System.out.println(b.id + " - " + b.title + " - " +
                (b.isAvailable ? "Available" : "Lent"));
        }
    }

    boolean lendBook(int id) {
        for (Book b : books) {
            if (b.id == id && b.isAvailable) {
                b.isAvailable = false;
                return true;
            }
        }
        return false;
    }

    boolean returnBook(int id) {
        for (Book b : books) {
            if (b.id == id && !b.isAvailable) {
                b.isAvailable = true;
                return true;
            }
        }
        return false;
    }
}

public class App {
    public static void main(String[] args) {
        Library lib = new Library();
```

```
        lib.addBook(1, "Java");
        lib.addBook(2, "Python");

        System.out.println("Before Lending:");
        lib.listBooks();

        lib.lendBook(1);

        System.out.println("\nAfter Lending:");
        lib.listBooks();
    }
}
```

2) Write Junit tests for lending success/failure scenarios

2A)

Code:

```
import org.junit.jupiter.api.Test;
import static org.junit.jupiter.api.Assertions.*;

class AppTest {

    @Test
    void testLendBookSuccess() {
        Library lib = new Library();
        lib.addBook(1, "Java");

        boolean result = lib.lendBook(1);

        assertTrue(result);
```

```
    }

    @Test
    void testLendBookFailure() {
        Library lib = new Library();
        lib.addBook(1, "Java");

        lib.lendBook(1); // already lent
        boolean result = lib.lendBook(1);

        assertFalse(result);
    }

    @Test
    void testReturnBook() {
        Library lib = new Library();
        lib.addBook(1, "Java");

        lib.lendBook(1);
        boolean result = lib.returnBook(1);

        assertTrue(result);
    }
}
```

3)Implement CI/CD pipeline with automated testing

3A)
